Software Engineering student at FPT University seeking a Java Fresher/Intern or Frontend React Intern position. Experienced in developing Java Web and React applications through academic projects. Passionate about clean code, RESTful APIs, responsive UI development, and collaborative software engineering.

EDUCATION

B.S. in Software Engineering

Sep 2023 – Present FPT University

Relevant Coursework: Software Engineering, Database Systems, Data Structures & Algorithms, Web Application Development, Software Requirements Engineering.

PROJECTS

Multi-Vendor Fashion E-commerce Platform (MVP Fashion)

Jun 2026 – Jul 2026

- Architected and developed a full-stack Seller Management Portal and Delivery module, handling seller onboarding, shop configuration, and end-to-end order fulfillment workflow.
- Implemented MVC architecture using Java Servlet, JSP, JSTL, and Bootstrap 5 with responsive user interfaces and role-based access control (RBAC) across 4 user roles.
- Integrated Cloudinary API for cloud-based media management with fallback mechanisms, Jakarta Mail for OTP email verification, and jBCrypt for password hashing.
- Designed database schemas and optimized data access layers using DAO pattern and JDBC with Microsoft SQL Server.
- Collaborated in an Agile/Scrum team using Git and GitHub for version control, code reviews, and conducted comprehensive system testing.
- Technologies: Java 21, Jakarta Servlet, JSP, JSTL, JDBC, MS SQL Server, Bootstrap 5, JavaScript, Cloudinary API, Maven, Git.
- GitHub: <https://github.com/KhanhHoa286/SE2034-SWP391-G6>

BakeryZone – E-Commerce Bakery Website

2026 – Present

- Built a full-featured e-commerce bakery platform with Customer and Admin role-based interfaces.
- Implemented product catalog with category filtering, search, cart management, and delivery time-slot booking.
- Developed Admin dashboard for product CRUD operations and customer order status tracking.
- Integrated Cloudinary API via custom Node.js backend for secure product image uploads.
- Technologies: React.js, React Router, Context API, Node.js, REST API, Cloudinary, Git.
- GitHub: [nguyenphucminh286-collab/FER_Project](https://github.com/nguyenphucminh286-collab/FER_Project)

TECHNICAL SKILLS

- Programming: Java, JavaScript, HTML, CSS, SQL, C/C++.
- Frameworks: React.js, JSP/Servlet.
- Database: Microsoft SQL Server.

- Tools: Git, GitHub, VS Code, NetBeans, IntelliJ IDEA.
- Concepts: OOP, MVC, REST API, Agile Development.

ACTIVITIES

- Team Member – **Multi-Vendor Fashion E-commerce Platform** (Software Engineering Project).

CERTIFICATIONS

- **Generative AI in Software Development** **Jan 2026**

Amazon via Coursera

Credential: <https://www.coursera.org>

- **Software Engineering: Implementation and Testing** **Jan 2026**

The Hong Kong University of Science and Technology

Credential: <https://www.coursera.org>

- **Software Engineering: Software Design and Project Management** **Jan 2026**

The Hong Kong University of Science and Technology

Credential: <https://coursera.org/share/1ae4ea6d88573a4161a83d1ed7b512a6>

LANGUAGE SKILLS

- Vietnamese: Native
- English: B2 (Upper-Intermediate)
